Good afternoon, all.

We are currently working on a process to export the self-created & self-managed groups and turn them into mail groups just like the classes, divisions & year levels.

The group naming constraint will be exactly as you have named them, but with the " " removed and an underscore "\_" substituted.

For example, the group 'Futsal T1 Girls Pink' will end up named 'Futsal\_T1\_Girls\_Pink'.

At this stage we're planning to do any & all groups of type 'Sport' and the '2013 Student Support Prefects' group.

If you have a group that you maintain and would like it included in the automatic process, please let me know its name and I can include it. If you for any reason need to change that group's name please notify me asap.

Regards,  
D.
