

MY IMAGE IS TOO LARGE FOR THE EDITING BOX!

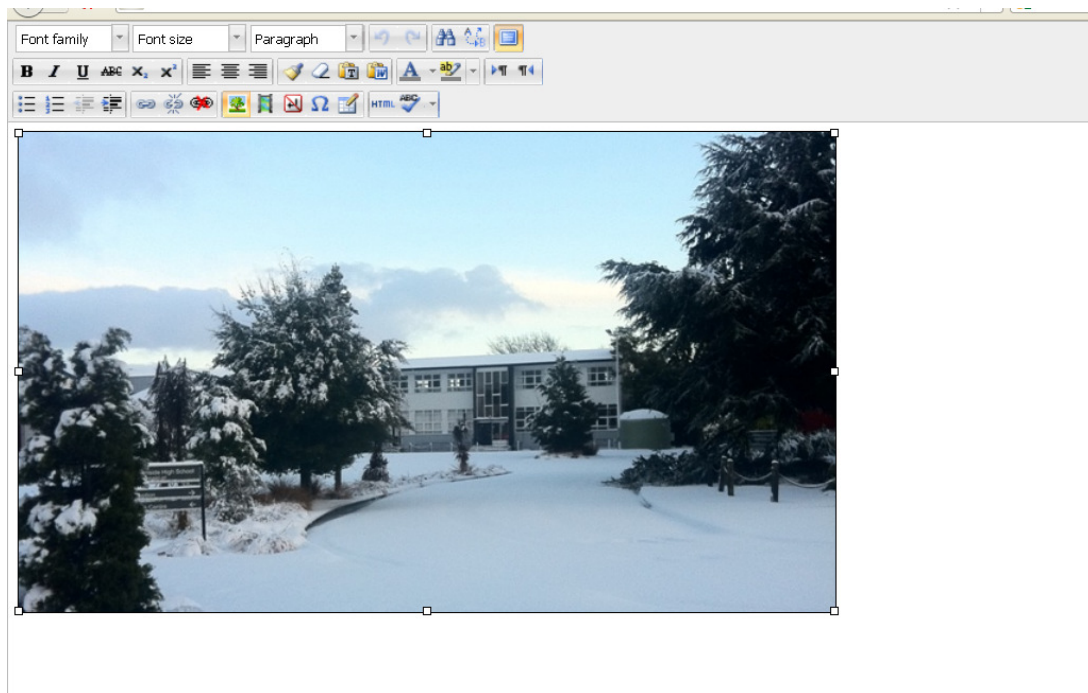

A solution for this is a little icon on the editing screen called 'Toggle Full Screen'.

 Adding a new Label to Topic 1 

Label text*

When you click this, you get a full screen view of your editing box, which looks like this:

Being now able to see the full image, you can pull in the corners until it is the correct size for your page. If you are using [Firefox](#) as your internet browser, the width and height of the image will be shown as you click and drag on the corners. Click on the Toggle Full Screen button again once you're happy that it's the right size.

Suggested widths for images in different parts of the page:

- A centre box: 640px (pixels)
- Left block: 200px
- Right block: 210px
