

# DRUGS ASSESSMENT

1. Get into pairs
2. Research a drug, using 1 or more lessons at the library
3. Present the information to the class

## Possible drugs to research:

Cocaine	LSD	Opium
Anabolic steroids	Magic mushrooms	Inhalants
Party Pills	Datura	Nitrous oxide
Ecstasy	Ketamine	GHB
Heroin	Morphine	Methamphetamine

In your pairs, use a library lesson to find out the following information:

- The name of your drug
- What forms it comes in
- How is it taken?
- How does it affect the user?
- Any other relevant/interesting information?

## How to present the information:

It is up to you how you want to present the information. Some ideas could include making a power-point or making a poster, or using the whiteboard. The presentation needs to be INTERESTING to listen to and watch, so try and be creative when presenting to your peers and teacher.

## Marking schedule:

Not Achieving	Basic information. Some questions not answered. A poor overall effort
Achieving	All questions answered
Achieving Well	All questions answered well
Excelling	All questions answered well, with excellent detail and information. Well presented.

MY GRADE FOR THIS ASSESSMENT: \_\_\_\_\_
